**PFGBEST Wealth Management Group Helps Clients
Build Personal, Sustainable Investing Strategies**

CEDAR FALLS, IOWA, March 8, 2011 – PFGBEST® has established a new division called the PFGBEST Wealth Management Group. This team of professionals was recruited to provide the next level of service to clients who seek sustainable alternative investment strategies.

“Utilizing the experience of these well-trained, seasoned wealth managers, the PFGBEST Wealth Management Group educates investors on the power of diversifying their portfolios across non-correlated asset classes,” said PFGBEST President and Chief Operating Officer Russ Wasendorf, Jr.

Said Ron Rabune, director of the PFGBEST Wealth Management Group, “Our main purpose is to empower investors, to help them learn about effective asset-class diversification, and how to use that knowledge to invest more efficiently. PFGBEST clients first identify their personal portfolio needs, and then make small changes to better balance their investments and reduce their exposure to volatility. They work with PFGBEST wealth managers to try to achieve long-term, sustainable results. Ultimately, we want investors to gain confidence in the level of and reliability of their overall returns.”

The PFGBEST Wealth Management Group offers knowledgeable and friendly people with years of experience in alternative investments such as CTA-managed programs, futures, options, precious metals, and more. In one-on-one consultations, clients enjoy useful discussions about diversification strategies accessible to them – without a hint of high-pressure sales tactics.

“Investing today requires more than just owning your home and contributing to your employer’s 401(K) plan. With a rapidly changing universe of investment choices available, it’s sometimes hard to have confidence in your investment decisions. The PFGBEST Wealth Management Group helps investors tackle these issues,” Rabune added.

PFGBEST offers products that help clients achieve their sustainability goals for longer-term investing, including managed futures and foreign exchange strategies, accumulation plans for gradual purchasing of gold, silver, or foreign currencies, and broker-assisted programs such as DIEM™ -- Diversified Investments in Efficient Markets.

About PFGBEST:

PFGBEST is among the largest non-clearing U.S. Futures Commission Merchants, with customers, affiliates and offices in more than 80 countries. PFGBEST specializes in sustainable investing practices through electronic trading, futures, foreign exchange, options, managed accounts, full-service and discount brokerage, precious metals, and investor research. The company is also an industry leader in market education, offering numerous free webinars each week attended by hundreds of people wishing to further their knowledge and skills in trading, charting, electronic market access, trading psychology, and many other topics.
