### Spread Driver Synopsis

Spread Driver is an X\_TRADER® Pro plug-in application that manipulates Autospreader® orders. It allows a trader to add, delete and change the quantity and price of an Autospreader order. All input values, such as the quantity and price of the order, can be updated dynamically through a link from an Excel® spreadsheet.

### Key Features

- Manage many predefined Autospreader spreads from one window
- Enter iceberg orders for any predefined Autospreader spread
- Dynamically turn on/off order submission via an Excel link
- Change the quantity and price of an order via Excel links
- Color-coded rows allow for quick recognition of the status
- Enter Inside and Outside Quote values to control excessive quoting
- Enter Inside and Outside Max Price Movement values as a safety feature to prevent order entry or order change if the entered price changes significantly

Active	Status	Autospreader Name	Description	Bid Iceberg	Submitted Bid Qty	Total Bid Qty	Bid Qty	Bid Price	Ask Price	Ask Qty	Total Ask Qty	Submitted Ask Qty	Ask Iceberg	Inside Quote	Outside Quote	Inside Max Price Movement	Outside Max Price Movement
