TT Keys Synopsis

TT Keys is an X_TRADER® Pro plug-in application that permits traders to enter and manipulate orders on any product that can be traded through X_TRADER Pro via the X-keys® keypad from P.I. Engineering, Inc. The user can set the different buttons of the keypad to perform preconfigured actions. The user also can set a key to perform a keyboard macro that will send keyboard events to the machine.

Key Features

- Enter and manipulate orders quickly and accurately with the X-keys keypad
- Customize the keypad to your specific preferences by mapping keystrokes to trading actions
- Easily delete all bids/offers or all orders per contract
- Quickly toggle between buy and sell orders
- Merge two or four buttons together to make larger keys
- Send keyboard events to the machine using a keyboard macro

Requirements: .NET Framework 2.0
X_TRADER Pro
X_TRADER API

Suitable Market: Traders
