Trade Analyzer Synopsis

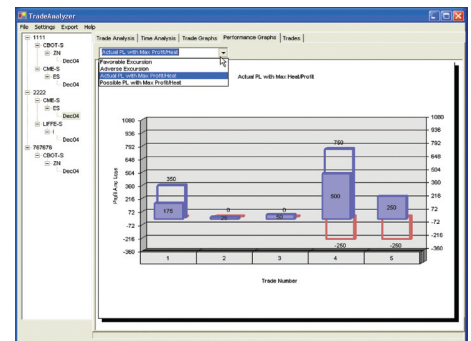

Trade Analyzer is a plug-in application for X_TRADER® Pro that gives a risk administrator or trader the ability to analyze the current day's trades from a comprehensive statistics report. Trade Analyzer includes individual trade analysis, time analysis, trade graphs, performance graphs and detailed trade lists. It is the perfect tool for training new traders or reviewing current trader performance to pinpoint weaknesses and strengths.

Key Features

- Allows traders to quickly distinguish winning trade characteristics vs. losing trade characteristics
- Automatically updates in real time throughout the day, including adding newly traded accounts and contracts
- Allows exporting of trade and time statistics to HTML files or Excel®
- Displays average dollar won/loss per trade as well as average tick size of winners and losers
- Calculates largest profit/loss in dollars and ticks as well as total profit/loss in ticks
- Statistics and graphs include average heat/profit and max heat/profit
- Calculates average duration of winning and losing trades as well as number of winning/losing trades by time of day
- Displays profit and loss in various graphical formats
- Displays detailed history of each trade
