Trade Tracker Synopsis

Trade Tracker is a stand-alone application for use with X_TRADER® that consists of a server-side database, which records all order and fill information. This data can be logged across exchanges and traders into a SQL Server, Oracle, MySQL, or Access database. Trade Tracker records all adds, changes, deletes, and fills that are accepted by the exchange. A firm can use Trade Tracker to record a multi-year archive of trading activity.

Key Features

- Records all adds, changes, deletes and fills that are accepted by the exchange in real time
- Can be configured to record only fills, only order actions, or both
- Runs continuously, every day, all day long
- Automatically logs in to the specified gateways with the user-defined logins and encrypted passwords
- Option to send emails if database or gateway connectivity issues occur
- Information can quickly and easily be retrieved by querying the database

Requirements:

- Trade Tracker license
- X_TRADER API
- SQL Server, Oracle, MySQL or Access

Suitable Market:

Risk Administrators

Users interested in this product might also be interested in ATLAS™, DART™ and Fill Recapper. Ask your Sales Account Manager today for more information about these products.
